Modern bioethics is called to solve the ethical questions related to medicine, life sciences and new technologies. Thus all complex of social, legal and ecological aspects should be considered. The world scientific community and the international organisations, such as UNESCO, the WHO, UNEP, the Council of Europe give great value to this problem, carry it to the priority.

The process of humanization of modern science, ongoing for the decades, cannot be carried out without development of ethical principles. Application of many newest biotechnologies, such as cloning, gene therapy, use of stem cells, synthetic biology, transplantation of organs, and unpredictability of their consequences claim due attention from the viewpoint of bioethics. Recently, a lot of new problems emerged, whereof the solution is closely connected with bioethics, most urgent of them being nanotechnologies, bioprotection and biosafety.

The previous National congresses on bioethics held in 2001, 2004 and 2007 not only confirmed the increasing interest to bioethics issues in Ukraine, but also gave a new impulse for the further practical work in this area.

Giving priority significance to the development of bioethics, the Presidium of National Academy of Sciences of Ukraine has made the decision on organizing, together with National Academy of Medical Sciences of Ukraine and Ministry of Health of Ukraine, of the Fourth National Congress on Bioethics in 2010.

The Organizing Committee invites you to take part in the work of the Congress which will take place in Kiev on 20-23 September, 2010.

THE AIMS OF THE CONGRESS
Key problems of bioethics in Ukraine and other countries of the world will be discussed during the Congress with leading scientists and experts in the filed of medicine, life sciences, philosophy and law, representatives of various religious faiths, mass media and public organizations.

The congress will promote the implementation of the Council of Europe « Convention on human rights and biomedicine», the UNESCO «Universal Declaration on Bioethics and Human Rights» as well as the further improvement of the legislation of Ukraine on bioethics, the realisation of help in conducting research in the field of natural sciences with observance of ethical standards and regulations, the spreading of teaching bioethics in educational institutions. Also, such event gives a good experience to make the work of scientific and medical establishments more transparent, to protect human rights and dignity with due account of modern achievements in biology and medicine.

MAIN TOPICS OF THE CONGRESS:
1. Influence of bioethics on public moral
2. Bioethics and law
3. Ethical problems of nano- and biotechnologies
4. Ecology and bioethics
5. Ethics in public health services
6. Ethical aspects of new medical technologies
7. Ethical problems in conducting clinical trials of medicinal preparations
8. Ethical aspects of biomedical research
9. Methodological aspects of spread of knowledge on bioethics, the codes of conduct on biosafety and bioprotection

INTERNATIONAL SEMINARS
・ Ethical aspects of nano- and biotechnologies
・ Lost opportunities in relation to the health of mother and child

SYMPOSIUMS
・ New biotechnology of agricultural and foodstuff: the analysis of ethical cautions. Ethical issues of enviromental aspects of GMO risk assessment
・ Moral and ethical aspects of the artificial terminating pregnancy

ROUND TABLES
・ Bioethical problems of harmonization of human rights and intellectual property rights
・ Ethical and legal aspects of medications research: experience of Ukraine in a world context

INTERNATIONAL WORKSHOP FOR COLLABORATION PROJECTS IN BIOETHICS

STRUCTURE OF THE CONGRESS:
The Scientific Programme will cover lectures on the key topics provided by leading scientists, reports at plenary and section sessions, discussions in working groups and round-table discussions, seminars and posters.
